Job Description

2x2 Consulting is looking for a Business Analyst II to provide customer support and services to the Project Management Center of Excellence (PMCoE), IT Governance, and Public Health Project Managers. The role involves assistance in research, budget and financial analysis, reviewing project documentation, preparing reports, monitoring project schedules, and managing project-related issues and risks. The Business Analyst will contribute to improving project life cycle workflows, developing best practices, and enhancing strategies for the project operations.

Requirements & Experience:
• 6 years of experience in business analyst work.
• Experience with Agile methodologies, including writing Epics and User Stories.
• Experience in business analyst work related to software applications, software development, or software quality assurance.
• Experience defining business and technical requirements for complex systems.
• Experience in report writing and presentation of findings.
• Knowledge of project management theories, methodologies, and practices.
