Job Description

2x2 Consulting is hiring a Junior Data Scientist for a remote position. Join us to collaborate on algorithmic problem-solving, develop algorithms, and contribute to internal data science libraries. This entry-level role is ideal for those proficient in Python and data analysis, with a passion for translating general problems into algorithmic solutions. #

Responsibilities

- Collaborate with various teams on algorithmic problem-solving.
- Develop and implement algorithms to solve business challenges.
- Assist in defining success criteria and communicate findings.
- Contribute to internal data science libraries.
- Work independently on multiple projects simultaneously.

Education & Experience

- Proficiency in Python and data analysis libraries.
- Understanding of data modeling and statistical analysis.
- Basic knowledge of optimization and predictive modeling techniques.
- Clear communication skills for technical and non-technical audiences.

Must Have

Educational Requirements

Bachelor's degree in Data Science, Computer Science, or related field.
