Job Description

2x2 Consulting is seeking a QA Engineer to participate in testing and quality assurance of secure mobile messaging software across various platforms. This role involves collaborating closely with QA and Engineering teams to ensure high-quality products in release cycles.

Education & Experience

- Bachelor's degree in Computer Science or relevant technical field
- 1+ years of experience in Software Product QA
- Experience testing Python, Node.js, and scripting languages
- Familiarity with the Atlassian suite and git

Knowledge, Skills, and Abilities:

- Experience with full test cycles and Linux command line
- Familiarity with cloud providers like AWS and MS Azure
- Automated testing experience on mobile platforms
- Understanding of QA practices and development lifecycle

Must Have

- Participation in mobile app testing through release cycles
- Involvement in engineering discussions and customer support
- Troubleshooting issues and assisting Engineering and QA teams

Educational Requirements

Bachelor's degree
