Job Description

Join 2x2 Consulting as an Entry Level Software Engineer, kickstarting your career with cutting-edge projects and collaboration with experienced professionals. Contribute to the development of innovative software solutions, write clean and efficient code, and participate in code reviews to maintain high-quality standards. This is an excellent opportunity for recent graduates or individuals with limited professional experience in software engineering.

Responsibilities

- Collaborate with the development team on designing, developing, and testing software applications.
- Write clean, efficient, and maintainable code.
- Participate in code reviews to ensure high-quality standards.
- Identify and troubleshoot software defects and issues.
- Contribute to the improvement of existing software products.
- Stay up-to-date with emerging technologies and industry trends.
- Communicate effectively with team members for successful project completion.

Requirements

- Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent experience).
- Strong understanding of software development fundamentals.
- Proficiency in one or more programming languages (such as Java, Python, C++, or JavaScript).
- Familiarity with software development tools and frameworks.
- Ability to work independently and as part of a team.
- Excellent problem-solving and analytical skills.
- Strong communication and collaboration abilities.

Preferred Qualifications

- Experience with version control systems (e.g., Git).
- Knowledge of web development technologies (HTML, CSS, JavaScript).
- Understanding of software testing methodologies and techniques.
- Familiarity with agile development methodologies (Scrum, Kanban).
- Projects or internships showcasing software development skills.
