Job Description

We're seeking a Splunk Security Consultant to provide consultancy services for Splunk SIEM implementation projects. Your role includes assessing clients' security needs, designing solutions, and conducting training sessions. If you have a strong background in SIEM consulting, excellent communication skills, and expertise in integrating Splunk with other security technologies, join our team.

Responsibilities:

- Provide consultancy services for Splunk SIEM implementation projects.
- Assess clients' security needs and design tailored solutions using Splunk technologies.
- Conduct workshops and training sessions on Splunk best practices.
- Collaborate with clients to define SIEM policies and incident response procedures.
- Stay updated on Splunk product releases and industry trends.

Requirements & Experience:

- Master's degree in Cybersecurity, Information Systems, or related field.
- 5+ years of experience in SIEM consulting with a focus on Splunk.
- Strong knowledge of SIEM frameworks and industry standards.
- Excellent communication and client-facing skills.
- Ability to lead SIEM implementation projects.
- *Must-Have:* Splunk Certified Implementation Engineer or higher certification.
- Experience in integrating Splunk with other security technologies.
